Izzy has a project to finish. She must share what she loves to do with her friends at school.

Izzy loves to skateboard and wants to share this in a fun and exciting way.

She meets Noah. Noah is a sound engineer. Sound effects and music can help make a scene happy, tense, or exciting.

Izzy meets Sam. Sam is the stage manager at the theatre. Every light, prop, and scenery change makes a live performance seem magical.

At the skatepark…

Izzy thinks about how to show other people the skateboarding she loves to do.

She has heard about how technology can help.

All these things have given her some great ideas.

Welcome to MASTERPIECE! The children will explore how people share their hobbies and interests in creative and captivating ways. They will learn about different places where people share their talents or go to enjoy a show. Experts from a variety of backgrounds are involved in every step of putting on a show from stage managers to performers. They’ll learn how to share their own interests and build a place of their own design.

Create and Test

The children will build stages where different types of performances can take place. They will explore coding and motorizing their team model. They will add lights and sounds to their model to make it stand out and be engaging for the audience.

Share

The children will record their ideas and designs in their Engineering Notebooks. They will share their builds and what they learned with others. Finally, they will participate in the festival, where they share their team posters and team models with reviewers, families, and friends. Most importantly they will…

...HAVE FUN!
